Product Description

PVC soffit stands out for its remarkable properties of being fire-resistant and lightweight. This combination brings significant benefits to both safety and installation processes.

The fire-resistant feature of the PVC soffit is a crucial aspect, offering an added layer of protection. In the event of a fire, it helps to slow down the spread of flames, enhancing the overall safety of the building.

The lightweight nature of the PVC soffit simplifies the installation process. It is easier for installers to handle and maneuver, reducing the physical effort and time required. This not only makes the installation quicker but also reduces the complexity and potential risks associated with handling heavy materials.

Overall, the combination of fire resistance and light weight in PVC soffit makes it a preferred choice, ensuring safety and facilitating a smooth and efficient installation process.

Features:

PVC Soffit – UPVC Soffit Board

UV Resistance – Yes

Size – 5m

Colour – White

Maintenance – Low

Finish – Smooth

Material – Unplasticised Polyvinyl Chloride Soffit Board (Unplasticized Polyvinylchloride Soffit Board)

Technical Parameters:

Product Name	UPVC Soffit Board
Material	Unplasticized Polyvinyl Chloride (UPVC)
Technology	Ultraviolet Protected & Treated
Width	300mm
Thickness	1mm
Size	5m
Durability	High
Fire Resistance	Yes
Maintenance	Low
Finish	Smooth
Weather Resistance	Yes
Installation Method	Screws

Applications:

HB-DECOR's UPVC Soffit Board is a great solution for any building project, with a low maintenance and UV resistance. This soffit board is made of PVC material, ensuring it has superior quality and performance. Its installation is simple and fast, using screws to secure it in place. It also offers a great finish, with a white colour that is both attractive and timeless. The UV protection is also excellent, making it resistant to the sun's rays and keeping it looking great for years to come. All in all, this UV shielded soffit board is an ideal choice for any building project, offering great performance and great looks at a great price.

At HB-DECOR, we are committed to providing our customers with the highest quality UV treated soffit board. Our UPVC soffit board is made to last, with its UV protection ensuring it is resistant to the sun's rays. The installation is also quick and easy, using screws to secure it in place. With its white colour, it is a great choice for any building project, offering a timeless look that can be enjoyed for years to come. No matter what your needs, our UV protected vinyl soffit board is an excellent option, at a great price.
